

## MODE MACHINES MIDI EXTENDER

The MIDI EXTENDER of the german manufacturer MODE MACHINES is a MIDI extender that is able to send MIDI data up to maximum 100 meter (from sender to the receiver). To connect the sender and the receiver, the user needs to connect a CAT5-CAT5 cable to both devices. Each product has two MIDI ports (one input port and one output port) and can be used as sender or as receiver. The used master unit needs to be powered by the Micro USB - USB A cable. A Master LED and a Power LED show the actual status to the user.
