

MODE MACHINES x0xb0x MK3 "FINAL EDITION"

The x0xb0x MK3 "FINAL EDITION" belongs to the german manufacturer MODE MACHINES. It is the fourth generation x0xb0x and the TB-303 clone can be controlled by MIDI and also decodes a fully functional sequencer.

The sequencer is programmable the same way as you already know it from the TB-303 and is able to control any synthesizer through one of the available Outputs. 128 track banks and 64 pattern banks are already factory fitted and allow high flexibility.
